**Subject:** No sprayfields or wetlands in Uniontown, Build a treatment plant

Dear ADEM,

We are very concerned with the daily overflows and dangers to public health & private property. We are very aware of the previous failures with sprayfields in Uniontown.

We do not approve building more sprayfields in Uniontown. We ask ADEM to support the City of Uniontown's efforts to locate funding for the construction of a state-of-the-art wastewater treatment plant NOW.

We ask ADEM to work with Uniontown to enforce the Clean Water Act, stop the daily sewage overflows of 3+ decades, and begin the construction of a mechanical treatment plant.

We ask all people regardless of class, color, sex, creed, or employer to join Black Belt Citizens and residents of Uniontown in the efforts to work with the City Council and Mayor for clean water and working sanitation.
